Senator Henry Stern
State Capitol
Sacramento, CA

March 22, 2018

Dear Senator Stern,

Thank you for your leadership on climate, clean energy, and the economy. California's efforts on these issues are unmatched by any other state and they have created a path for California's economy to grow and for an emissions trajectory that continues to trend in the direction that we need it to go.

The groups signing this letter support SB 1380 (Stern), which would lead to coordination of the existing myriad of state government clean energy financing programs, making them complementary and maximizing their efficiency. It is not a new government program and should take minimal resources to implement. This effort could help identify the pipeline of efficiency and innovation projects and deals that will be necessary for California to achieve its ambitious greenhouse goals.

We support SB 1380 and urge the legislature to support this bill as well. Thank you for your time and work on this issue.

Sincerely,

Tim McRae
